DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,177,178 B1 in view of U.S. Patent No. 4,587,174 to Yoshimura et al.

The patented US'178 and pending claims set forth the same invention of substantially the same scope except the invention of patented lacks: the exact same percentage of elements, such as 7.1-7.9 wt-% Co (US'178 has 8.6-9.5 wt-% Co); a highly W-

alloyed binder phase with a CW-ratio of 0.85-0.96 (US'178 has CW-ratio of 0.78-0.93).

However, the differences are small.

Further, Yoshimura et al. (US 4,587,174) teaches that the small amount of weight percent difference does not adversely affect the properties of the cermet. As shown in Col. 2, lines 57-62, Yoshimura et al. discloses: "the tungsten cermet according to the present invention may contain not more than about 1% by weight of inevitable impurities such as Mo, Cr, Fe, Ni, Co and Re. Such impurities in an amount of not more than about 1 weight percent do not adversely affect the properties of the cermet according to the present invention".

It would have been obvious to one having ordinary skill in the art at to modify US'178's tool to comprise the same percentage of elements in the claimed ranges, such as 7.1-7.9 wt-% Co; a highly W-alloyed binder phase with a CW-ratio of 0.85-0.96, as taught by Yoshimura et al., since the changes are small amount and do not adversely affect the properties of the US'178's tool.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
